

Liquidity Coverage Ratio

Central Bank of Kuwait had adopted at its meeting convened on 23/12/2014 the Liquidity Coverage Ratio ("LCR") for local Islamic banks, to promote resilience of banks liquidity risk management by ensuring that they have sufficient High Quality Liquid Assets (HQLA) to survive a significant stress scenario lasting for one month. At minimum, such stock of liquid assets should enable the bank to survive until 30 days of the stress scenario. Liquidity Coverage Standard (as a percentage) is calculated as follows:

$$\frac{\text{Stock of Islamic Shari'ah Compliant HQLA}}{\text{(Net Cash Outflows over the Next 30 Calendar Days)}}$$

As per CBK instructions banks should maintain LCR with effect from 1st March 2016 to end 2016 at above 70%. The following table sets forth the average (simple) for the quarter ending on 30.06.2016 for all business days of the reporting period. Bank has complied with this ratio on all days of the quarter.

** Simple Average for all business days of the reporting period.

Based on the simple average of all days of the reporting period the bank's LCR is 128.19% (All currencies). A significant portion representing 92% the total HQLA comprise of Level I assets, mainly supported by CBK deposits, which has been a consistent component over the reporting period. The main constituent of the cash outflows (values after run off) was other legal entity customers (Banks, Financial Institutions) representing a concentration of 49% of the outflows. Consistent HQLA in the form of CBK deposits was the main driver of a strong HQLA during the reporting period.
